

AMAR TEX CHEM

COMPANY HAS BEEN IN THE TEXTILE CHEMICAL BUSINESS SINCE 2002

OT PASTE

General Name		Diocetyl sodium sulfosuccinate
Product Name		OT Paste
Saponification value		240-253
Content		60-85%
PH Value (1% aqueous solution)		Slightly acidic
Solubility		Sparingly soluble
Dosage		0.5% of Material
Appearance		Clear, Colorless Transparent Wax

Features and Applications

OT Paste, chemically known as dioctyl sodium sulfosuccinate, is a white, wax-like solid with a characteristic Odor. It is used as a wetting agent in the textile industry due to its effective wetting properties. It is sparingly soluble in water but freely soluble in various organic solvents such as alcohol, glycerol, carbon tetrachloride, acetone, and xylene. Its saponification value ranges from 240 to 253, indicating its functionality in textile processing. OT Paste remains stable in acidic and neutral conditions but hydrolyses in alkaline solutions. The product is highly efficient, with a concentration of 0.5% being sufficient to wet cotton fibres or cloth instantaneously

OT LIQUID

General Name		Dioctyl sodium sulfosuccinate
Product Name		OT Liquid
Saponification value		240-253
Content		56%
PH Value (1% aqueous solution)		Slightly acidic
Solubility		Easily soluble in water
Dosage		01-2% of Material
Appearance		Clear, Colorless Transparent Liquid

Features and Applications

OT Liquid is a white, clear with a characteristic Odor. It is used as a wetting agent in the textile industry due to its effective wetting properties. It is easily soluble in water. Indicating its functionality in textile processing. OT Liquid remains stable in acidic and neutral conditions but hydrolyses in alkaline solutions. The product is highly efficient, with a concentration of 1-2% being sufficient to wet cotton fibres or cloth instantaneously.
